## CSR India 2024 Deeply dedicated to empowering change

We're not just a part of communities – we play an active role in helping to shape them. Wherever we are in the world, we create a culture of giving – to enrich the lives of those around us.

Whether it's education initiatives, looking after our planet, delivering basic needs, or providing relief in emergencies, we are passionate about making a difference. We work together with like-minded partners towards these goals. Our people are at the heart of our initiatives and are proud to offer their skills and expertise.

Together, we are deeply dedicated to empowering change – for the society of today and generations of tomorrow.

Our corporate social responsibility agenda focuses on two impact areas: education and environment.

## Education

We help people expand their professional and personal competencies and skills through targeted educational initiatives. We help provide the knowledge and tools that enable them to navigate a rapidly changing world. Our employee volunteers are involved in implementing effective responses to educational issues as well.

## Environment

We contribute towards the conservation and protection of the environmen This includes supporting projects that help communities become more climate resilient and projects that create awareness through education. Our employee volunteers participate in projects to learn first-hand why intact ecosystems and biodiversity are so important for our planet.
