## Overview

The following information is compiled in terms of the requirements of the Central Bank of the U.A.E. as per Notice No. CBUAE/BSN/2020/66 (Jan 2020); CBUAE/BSN/2020/4980 (Nov 2020); CBUAE/BSN/2022/1887 - Pillar 3 Explanatory Notes (May 2022) and Guidance Re Capital Adequacy of Banks in the UAE version Dec 2022.

Banks are obliged to report certain qualitative and quantitative information with regards to their risk profile and capital adequacy on a regular basis to the public, which incorporates the revised Basel III Pillar 3 requirements on market discipline.

### *Reporting framework*

The information disclosed in this report is based on the definitions, calculation methodologies and measurements as defined by the Amended Regulations. All tables, diagrams, quantitative information and commentary in this risk and capital management report are unaudited unless otherwise noted.

References to fixed format templates as required under the revised Pillar 3 disclosure requirements are made throughout this document and highlighted in the relevant sections.

### *Period of reporting*

This report is in respect of the quarter ended 30 Sep 2023, including comparative information (where applicable).

### *Group Disclosures*

The Group employs a centralized approach to risk management. As such, DB AG Abu Dhabi Branch's approach to risk management follows group policies and procedures as a minimum standard. Where local requirements differ from group's, a local policy/procedure is formulated and adopted. This report should thus be read in conjunction with the group's Management Report, Annual Report and Pillar 3 disclosures.

## Overview of Risk Management & RWAs

### Capital Adequacy (KM1)

The Branch's objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position are:

- To comply with the capital requirements set by the Central Bank of U.A.E.,
- To safeguard the Branch's ability to continue as a going concern and increase the returns for the shareholders, and
- To maintain a strong capital base to support the development of its business.

The Branch's regulatory capital is analyzed into two tiers:

- Tier 1 capital, which includes share capital, reserves, retained earnings and other regulatory adjustments relating to items that are included in equity but are treated differently for capital adequacy calculation purposes.
- Tier 2 capital, which includes collective impairment allowance and fair value reserves relating to unrealized gains/losses on investments classified as available for sale. Various limits are applied to elements of the capital base:
  - CET1 must be at least 7.0% of risk weighted assets (RWA),
  - Tier 1 Capital must be at least 8.5% of risk weighted assets, and
  - Total Capital, calculated as the sum of Tier 1 and Tier 2 Capital, must be at least 10.5% of RWAs.

The assets of the Branch are risk weighted as to their relative Credit, Market, and Operational risk.

Credit risk includes both On and Off-balance sheet risks.

Market risk is defined as the risk of losses in on and off-balance sheet positions arising from movements in market prices and includes profit rate risk, foreign exchange risk, equity exposure risk, and commodity risk.

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people, or systems, or from external events.

The Branch follows the standardized approach for Credit, Market and Operational risk, as permitted by the U.A.E. Central Bank and as per Pillar 1 of Basel III.

As per CBUAE regulations, Branch is not required to report LCR (Liquidity Coverage Ratio) and NSFR (Net Stable Funding Ratio). Branch reports ELAR (Eligible Assets Ratio) and LSRR (Lending to Stable Resources Ratio) as an alternate.

## Total Capital Ratio

TCR for the Branch as of September 30, 2023, is 37.90%.

## Leverage Ratio (LR2)

The Leverage ratio (LR) was introduced as a complementary measure to the risk-based capital framework to help ensure broad and adequate capture of both the on-and off-balance sheet sources of banks leverage.

This simple, non-risk based “Backstop” measure will restrict the build-up of excessive leverage in the banking sector to avoid destabilizing deleveraging processes that can damage the broader financial system and the economy. Illustrated below is DBAG Abu Dhabi’s Leverage position as measured by the Basel III Leverage ratio where last two quarters resulting LR was more than the minimum requirement of 3% Leverage Ratio.

		Sep-23	Jun-23
		AED'000	AED'000
<b>On-balance sheet exposures</b>			
1	On-balance sheet exposures (excluding derivatives and securities financing transactions (SFTs), but including collateral)	1,963,892	2,541,945

## Liquidity

### Eligible Liquid Assets Ratio

Eligible Liquid Assets Ratio is a measure to ensure banks hold minimum buffers of liquid assets. The ratio requires the bank to hold an amount equivalent to 10% of its total balance sheet liabilities (excluding those included in regulatory capital) in high quality liquid assets.

As of Sep 30, 2023, branch's ELAR is 62.80% which is more than the required minimum of 10%.

3	Eligible Liquid Assets Ratio (ELAR)	62.80%	43.27%	43.96%	41.45%	45.14%

## Lending to Stable Resources Ratio (LSRR)

The Lending to Stable Resources Ratio (LSRR) is a measure that recognizes both the actual uses as well as the uses of funds in terms of the contractual maturity and behavioral profile of the sources of funds available to the bank, to ensure that there are limited maturity mismatches and cliff effects. Central Bank reporting for BRF 7 details the requirements of the ratio.

LSRR should not exceed 100%. The branch's ratio is 17.24%, this is the equivalent percentage of the total advances being funded by stable resources (i.e., customer deposits, etc.). This provides the branch enough flexibility in managing extra resources and its balance sheet in the long-term.
