Germany with limited liability)

Financial statements
for the year ended
31 December 2022

INDEPENDENT AUDITORS' REPORT

To the Directors of Deutsche Bank AG, Pakistan Operations

Report on the Audit of the Financial Statements

Opinion

We have audited the annexed financial statements of Deutsche Bank AG, Pakistan Operations (the Pakistan Operations), which comprise the statement of financial position as at 31 December 2022, the profit and loss account, the statement of comprehensive income, the statement of changes in equity and the cash flows statement for the year then ended, along with notes to the financial statements including a summary of significant accounting policies and other explanatory information and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, the profit and loss account, the statement of comprehensive income, statement of changes in equity and statement of cash flow together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan, and give the information required by the Banking Companies Ordinance, 1962 and the Companies Act, 2017(XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Pakistan Operation's affairs as at 31 December 2022 and of the income, other comprehensive income, the changes in equity and its cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Bank (The Pakistan operations) in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting and reporting standards as applicable in Pakistan, the requirements of Banking Companies Ordinance, 1962 and the Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Pakistan Operation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Pakistan operations or to cease operations, or has no realistic alternative but to do so.

The management is responsible for overseeing the Pakistan Operation's financial reporting process.

for

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Pakistan Operation's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Pakistan Operation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Pakistan Operation to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

1. Based on our audit, we further report that in our opinion:
 - a) proper books of account have been kept by the Pakistan Operation as required by the Companies Act, 2017 (XIX of 2017);
 - b) the statement of financial position, the profit and loss account, the statement of comprehensive income, statement of changes in equity and statement of cash flow (together with the notes thereon have been drawn up in conformity with the Banking Companies Ordinance, 1962 and the Companies Act, 2017(XIX of 2017) and are in agreement with the books of account and returns;

EY

Building a better
working world

-:3:-

- c) investments made, expenditure incurred and guarantees extended during the year were in accordance with the objects and powers of the Pakistan Operation and the transactions of the Pakistan Operation which have come to our notice have been within the powers of the Pakistan Operation; and
 - d) No zakat deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980), was deducted by the Pakistan Operations and deposited in the Central Zakat Fund established under section 7 of that Ordinance.
2. We confirm that for the purpose of our audit we have covered more than sixty per cent of the total loans and advances of the Pakistan Operations.

The engagement partner on the audit resulting in this independent auditors' report is Arslan Khalid.

Deutsche Bank AG, Pakistan Operations
(Incorporated in the Federal Republic of Germany with limited liability)
Notes to the Financial Statements
For the year ended 31 December 2022

1. STATUS AND NATURE OF BUSINESS

Deutsche Bank AG is a foreign banking company incorporated in the Federal Republic of Germany with limited liability. Its operations in Pakistan are carried out through two branches (2021: two branches) located at Karachi and Lahore ("the Pakistan Operations"). The Pakistan Operations are engaged in banking business as described in the Banking Companies Ordinance, 1962.

2. BASIS OF PRESENTATION

In accordance with the directives of the Federal Government regarding shifting of the banking system to the Islamic modes, the State Bank of Pakistan (SBP) has issued various circulars from time to time. Permissible forms of trade related modes of financing include purchase of goods by the Pakistan Operations from its customers and immediate resale to them at appropriate mark-up in price on deferred payment basis. The purchases and sales arising under these arrangements are not reflected in these financial statements as such but are restricted to the amount of facility actually utilized and the appropriate portion of mark-up thereon.

2.1 Statement of Compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards comprise of:

- International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) as are notified under the Companies Act, 2017;
- Provisions of and directives issued under the Banking Companies Ordinance, 1962 and the Companies Act, 2017;
- Directives issued by State Bank of Pakistan (SBP) and the Securities and Exchange Commission of Pakistan (SECP).

Whenever the requirements of the Banking Companies Ordinance, 1962, the Companies Act, 2017 or the directives issued by SBP and SECP differ with the requirements of the IFRS, the Banking Companies Ordinance, 1962, the Companies Act, 2017 and the said directives shall prevail.

SBP has deferred the applicability of International Accounting Standard (IAS) 39, 'Financial Instruments: Recognition and Measurement' and IAS 40, 'Investment Property' for Banking Companies in Pakistan through BSD Circular Letter No. 10 dated 26 August 2002 till further instructions. Further, SBP vide its BPRD Circular No. 03 of 2022 dated 05 July 2022 directed the banks in Pakistan having asset size of less than Rs. 500 billion to implement IFRS 9 'Financial Instruments' with effect from 01 January 2024. SECP has deferred the applicability of IFRS 7 'Financial Instruments: Disclosures' through its notification S.R.O 411 (I) / 2008 dated 28 April 2008. Accordingly, the requirements of these standards have not been considered in the preparation of these financial statements. However, investments have been classified and valued in accordance with the requirements prescribed by SBP through various circulars.

These financial statements have been prepared in accordance with forms for the preparation of the annual financial statements of the banks issued by SBP, vide its BPRD Circular No. 02 dated January 25, 2018.

2.2 Credit Rating

The credit rating provided by Standard & Poor's on 02 Feb 2023 is A- for long-term and A-2 for short-term, rating by Fitch on 25 November 2022 is BBB+ for long-term and F2 for short-term; and rating by Moody's on 02 February 2023 is A1 for long-term.

2.3 Standards, interpretations and amendments to accounting and reporting standards as applicable in Pakistan that are effective in the current year

The Pakistan Operations has adopted the accounting standards, interpretations and amendments of IFRSs and the improvements to accounting standards which became effective for the current year, however they do not have an impact on the Bank's financial statements.

2.4 Standards, interpretations and amendments to published accounting and reporting standards as applicable in Pakistan that are not yet effective

2.4.1 IFRS 9 'Financial Instruments'

IFRS 9 'Financial Instruments' - IFRS 9 replaced the existing guidance in IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39. SBP vide its BPRD Circular Letter No. 3 of 2022 dated July 05, 2022 has extended the implementation date of IFRS 9 to January 01, 2024 from an earlier implementation date of January 01, 2022. However, SBP has directed the banks in Pakistan to submit IFRS 9 parallel run and proforma financial statements on periodic basis based on the instructions issued by the SBP for parallel run of IFRS 9 and the Pakistan Operations has been complying with these requirements.

2.4.2 Further, the following IFRS as notified under the Companies Act, 2017 and the amendments thereto will be effective for future accounting periods and not early adopted:

Standard and Amendments	Effective date (accounting periods beginning on or after)
- Classification of Liabilities as Current or Non-current - Amendments to IAS 1	January 01, 2023
- Definition of Accounting Estimates - Amendments to IAS 8	January 01, 2023
- Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2	January 01, 2023
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to IAS 12	January 01, 2023
- Lease Liability in a Sale and Leaseback - Amendments to IFRS 16	January 01, 2024
- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture -Amendments to IFRS 10 and IAS 28	Not yet finalized

Further, following new standards have been issued by IASB which are yet to be notified by the SECP for the purpose of applicability in Pakistan.

Standard	Standard IASB effective date (annual periods beginning on or after)
- IFRS 1 – First time adoption of IFRSs	July 01, 2009
- IFRS 17 – Insurance Contracts	January 01, 2023

2.5 Critical accounting estimates and judgments

The preparation of financial statements in conformity with approved accounting standards as applicable in Pakistan requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Bank's accounting policies. The significant accounting areas where various assumptions and estimates are significant to the Bank's financial statements or where judgment was exercised in the application of the accounting policies are as follows:

- Defined benefit plan (Note 4.7)
- Taxation (Note 4.10)
- Advances (Note 4.4)
- Operating fixed assets and depreciation (Note 4.5)
- Leases (Note 4.5)

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

3. BASIS OF MEASUREMENT

3.1 These financial statements have been prepared under the historical cost convention, except for investments and derivative financial instruments, which have been marked to market and are carried at fair value. Staff retirement benefit (pension) is stated at present value.

- 3.2** The preparation of financial statements in conformity with the accounting and reporting standards as applicable in Pakistan requires management to make judgments, estimates and assumptions that effect the application of accounting policies and reported amounts of assets and liabilities and income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.
- 3.3** These financial statements are presented in Pak rupees (PKR) which is the Pakistan Operations' functional currency.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to these financial statements

4.1 Cash and cash equivalents

For the purposes of cash flow statement, cash and cash equivalents comprise cash and balances with treasury banks, balances with other banks and overdrawn nostros.

4.2 Lendings / borrowings (reverse repo / repo)

Purchase under resale agreements

The Pakistan Operations enter into purchase of investments under agreements to resell investments at a certain date in the future at a fixed price. Investments purchased subject to commitment to resell them at the future dates are not recognized. The amounts paid are recognized in lendings to financial institutions. The receivables are shown as collateralized by the underlying security.

Sale under repurchase agreement

Investments sold under repurchase agreements continue to be recognized in the statement of financial position and are measured in accordance with the accounting policy for investments. The proceeds from the sale of the investments are reported in borrowings from financial institutions.

The difference between the purchase / sale and resale / repurchase consideration is recognized on a time proportion basis over the period of the transaction and is included in mark-up / return / interest earned or expensed.

4.3 Investments

In accordance with the requirements of BSD Circular No. 10 dated 13 July 2004 the investments are classified as follows:

Held to maturity

These are securities with fixed and determinable payments and fixed maturity which are acquired with the intention and ability to hold them up to maturity. These are carried at amortized cost.

Held for trading

These are securities, which are either acquired for generating profit from short-term fluctuation in market prices, interest rate movements, dealers margin or are securities included in a portfolio in which a pattern of short-term profit making existed.

Available-for-sale

The securities which are not held for trading and held-to-maturity are classified as available-for-sale (AFS).

The Pakistan Operations designate the classification of securities at the time of acquisition.

All purchase and sale of investments that require delivery within the time frame established by regulation or market convention are recognized at the trade date, which is the date the Pakistan Operations commit to purchase or sell the investments.

Investments (other than held for trading) are initially measured at fair value plus transaction cost associated with the investment. Investments classified as held for trading are initially measured at fair value, and transaction costs are expensed in the profit and loss account.

Surplus / (deficit) arising on revaluation of securities which are classified as 'available-for-sale', is included in the statement of comprehensive income and is shown in the statement of financial position as part of equity. The surplus / (deficit) arising on these securities is taken to the profit and loss account when actually realised upon disposal or in case of impairment of securities. The unrealised surplus / (deficit) arising on revaluation of securities which are classified as held for trading is taken to the profit and loss account.

Premium or discount on debt securities classified as available for sale and held to maturity is amortised using effective interest method and taken to the profit and loss account.

4.4 Advances

Advances are stated net of specific and general provision against loan losses. Specific provision is made for non-performing advances to reduce book value of such advances to their expected realizable value in compliance with the Prudential Regulations of SBP. The Pakistan Operations also establish a general allowance for loan losses to encompass the loss inherent in performing loans based on historical loss experience and country risk. Advances are written-off when there are no realistic prospects of recovery.

4.5 Operating fixed assets and depreciation

Owned

Operating fixed assets other than capital work-in-progress, are stated at cost less accumulated depreciation and impairment losses (if any). Capital work-in-progress is stated at cost less impairment losses (if any).

Subsequent costs are included in the assets carrying amounts or are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Pakistan Operations and the cost of the item can be measured reliably. All other repair and maintenance expenses are charged to profit and loss account.

Depreciation on fixed assets is charged to income applying the straight-line method from the date the assets are available for use. Gain or loss on disposal is taken to income currently.

Leases

A contract is, or contains a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration. The Pakistan operations mainly lease properties for its operations and recognizes a right-of-use asset and lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, and subsequently at cost less any accumulated depreciation and impairment losses, and adjusted for certain remeasurements of the lease liability. The right-of-use asset is depreciated using the straight line method from the commencement date to the earlier of end of the useful life of the right-of-use asset or end of lease term. The estimated useful lives of assets are determined on the same basis as that for owned assets. In addition, the right-of-use asset is periodically reduced by impairment losses, if any.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Pakistan operations' incremental borrowing rate. The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payments made. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, a change in assessment of whether extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised.

The Pakistan Operations may elect not to recognise right-of-use assets and lease liabilities for short-term and low value assets. The lease payments associated with these leases are recognised as an expense on a straight line basis over the lease term. The right-of-use assets are presented in the same line item as it presents underlying assets for the same nature it owns.

4.6 Borrowings / deposits

(a) Borrowings / deposits are recorded at the time when the proceeds are received.

(b) Borrowing / deposit costs are recognised as an expense in the period in which these are incurred using the effective mark-up / interest rate method.

4.7 Staff retirement benefits

Defined benefit plan

The Pakistan Operations operate a funded pension scheme for all of their permanent employees. The costs are determined based on actuarial valuation carried out using the Projected Unit Credit Method. All actuarial gains and losses are recognized outside the profit and loss account in the statement of comprehensive income.

Defined contribution plan

The Pakistan Operations also operate approved provident fund and gratuity fund scheme for all of their permanent employees in respect of which contributions are made to the respective trusts.

4.8 Foreign currencies

Foreign currency transactions are translated into rupees at exchange rates prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are translated into rupees at the rate of exchange prevailing at the statement of financial position date. Outstanding forward foreign exchange contracts are valued at the forward rates applicable to their respective maturities. Commitments for outstanding forward foreign exchange contracts are disclosed in financial statements at contracted rates with the fair value adjustment disclosed in other assets / other liabilities, as the case may be.

Contingent liabilities / commitments for letter of credit and letter of guarantee denominated in foreign currencies are expressed in Rupee terms at the exchange rates prevailing at the statement of financial position date.

Exchange gains and losses are included in income, except for exchange gain / loss on foreign currency capital account, which is recognized directly as the appreciation / diminution of the Head office capital account.

4.9 Revenue recognition

- (a) Mark - up / return / interest on advances and investments is recognised on accrual basis, except in case of advances classified under the Prudential Regulations on which mark - up is recognised on receipt basis. Mark - up / return / interest on reschedule / restructured loans and advances and investments is recognized as permitted by the regulation of SBP.
- (b) Gain or loss on sale of investments are recognised in profit and loss account in the year in which they arise.
- (c) The Bank earns fee and commission income from a diverse range of financial services it provides to its customers. Fee and commission income is recognised at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for providing the services.
- (d) The Pakistan Operations recognises fees earned on transaction-based arrangements at a point in time when the service has been provided to the customer. Where the contract requires services to be provided over time, income is recognised on a systematic basis over the life of the agreement.

4.10 Taxation

Current

Current tax is the expected tax payable on the taxable income for the year using tax rates enacted or substantively enacted at the statement of financial position date and any adjustment to tax payable in respect of previous years.

Deferred

Deferred tax is provided using the balance sheet method on all material temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities using tax rates enacted or substantively enacted at the statement of financial position date. A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available and the credits can be utilized. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

4.11 Impairment

The carrying amount of non-financial assets are reviewed at each statement of financial position date to determine whether there is any indication of impairment of any asset or group of assets. If such indication exists, the recoverable amount of the asset is estimated. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognized in profit and loss account.

4.12 Other provisions

Provisions are recognized when the Pakistan Operations have a legal or constructive obligation as a result of past events, if it is probable that an outflow of resources will be required to settle obligation and a reliable estimate of amount can be made. Provisions are reviewed at each statement of financial position date and are adjusted to reflect the current best estimate.

4.13 Off setting

Financial assets and financial liabilities are only off-set and the net amount is reported in the financial statements when there is a legally enforceable right to off-set the recognized amount and the Pakistan Operations intend either to settle on a net basis, or to realize the assets and to settle the liabilities simultaneously. Income and expense items of such assets and liabilities are also off-set and the net amount is reported in the financial statements.

4.14 Derivative financial instruments

Derivative financial instruments are initially recognized at fair value on the date on which the derivative contract is entered into and are subsequently remeasured at fair value. All derivative financial instruments are carried as assets when fair value is positive and liabilities when fair value is negative. Any change in the fair value is taken to the profit and loss

4.15 Segment reporting

A segment is a component of the Pakistan Operations that engages in business activities for which it may earn revenues and incur expenses (including revenue and expense relating to transactions with other component), whose results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and for which financial information is available.

Business Segment

A brief description of the products and services offered by different segments of the Bank is given in note 34 to these financial statements.

Geographical segments

The Bank operates only in Pakistan.

4.16 Acceptances

Acceptances comprise of undertakings by the Pakistan Operations to pay bills of exchange drawn on customers. Acceptances are recognized as financial liability in the statement of financial position with a contractual right of reimbursement from the customer as a financial asset; therefore, commitments in respect of acceptances have been accounted for as financial assets and liabilities.

Cheques in clearing		<u>427,113</u>	<u>125,730</u>

18.3 Other contingent liabilities

The Pakistan Operations has Rs. 562 million as contingent liabilities (December 31, 2021: Rs. 200 million). During the year, proceedings were made for tax year 2017 under section 177 of the Income Tax Ordinance, 2001, where the assessing officer vide order dated February 28, 2023, passed under section 122(1) of the Ordinance, created a contingency of Rs. 362 million. The Bank has filed an appeal before the Commissioner Appeals against the order of the officer. Additionally, other contingencies majorly include those for tax year 2012, 2013 and 2016. Primarily, these are disallowances made for unrealized exchange losses, mark up interest accrued and interest on loans to employees. The Pakistan Operations is vigorously contesting at different fora and is confident that no additional liabilities would arise.

31 DEFINED BENEFIT PLAN

31.1 General description

All permanent employees of the Pakistan Operations are eligible for pension under the pension fund scheme on completing 10 years of service with the Pakistan Operations. The benefit under the scheme, which is inflation adjusted on an annual basis, comprises of 1.5 percent of monthly basic salary (during the last completed year of service) for each year of service, subject to a maximum of 30 years of service. The number of staff under the scheme are 85 (2021: 84).

31.2 Principal actuarial assumptions

The actuarial valuation of the defined benefit plan was carried out at 31 December 2022. Projected Unit Credit Method is used for the calculation and the key assumptions used for actuarial valuation were as follows:

	2022	2021
	----- (Per annum) -----	
Discount rate	14.25%	12.41%
Expected rate of return on plan assets	14.25%	10.25%
Expected rate of salary increase	14.00%	12.16%
Expected rate of increase in pension	7.48%	6.28%

31.3 Reconciliation of receivable from defined benefit plans

	Note	2022	2021
		----- Rupees in '000 -----	
Present value of obligations	31.4	857,182	839,507
Fair value of plan assets	31.5	<u>(881,175)</u>	<u>(849,183)</u>
	31.6	<u>(23,993)</u>	<u>(9,676)</u>

31.4 Movement in defined benefit obligations

Obligations at the beginning of the year	839,507	835,613
Current service cost	29,721	27,526
Interest cost	101,536	85,336
Benefits paid	(42,663)	(31,406)
Re-measurement loss / (gain)	(70,919)	(77,562)
Obligations at end of the year	<u>857,182</u>	<u>839,507</u>

31.5 Movement in fair value of plan assets

Fair value at the beginning of the year	849,183	796,097
Interest income on plan assets	104,568	81,265
Contributions	29,519	27,563
Benefits paid	(42,663)	(31,406)
Return on plan assets	(59,432)	(24,336)
Fair value at end of the year	31.8 <u>881,175</u>	<u>849,183</u>

31.6 Movement in payable under defined benefit schemes

Opening balance	(9,676)	39,516
Charge for the year	31.7.1 <u>26,689</u>	31,597
Contribution	(29,519)	(27,563)
Re-measurement loss / (gain) recognised in OCI during the year	31.7.2 <u>(11,487)</u>	<u>(53,226)</u>
Closing balance	<u>(23,993)</u>	<u>(9,676)</u>

31.7 Charge for defined benefit plans**31.7.1 Cost recognised in profit and loss**

Current service cost	29,721	27,526
Net interest on defined benefit asset / liability	(3,032)	4,071
	<u>26,689</u>	<u>31,597</u>

31.7.2 Re-measurements recognised in OCI during the year

Loss / (gain) on obligation		
- Demographic assumptions	(8,333)	-
- Financial assumptions	(53,187)	(63,543)
- Experience adjustment	(9,399)	(14,019)
Return on plan assets over interest income	59,432	24,336
Total re-measurements recognised in OCI	<u>(11,487)</u>	<u>(53,226)</u>

31.8 Components of plan assets

Cash and cash equivalents - net	5,386	66,365
Government Securities	875,789	782,818
	<u>881,175</u>	<u>849,183</u>

31.9 Sensitivity analysis

The increase / (decrease) in the present value of defined benefit obligations as a result of change in each assumption is summarised as illustrated below:

	2022 Rupees in '000
1% increase in discount rate	(85,586)
1% decrease in discount rate	102,815
1 % increase in expected rate of salary increase	18,906
1 % decrease in expected rate of salary increase	(17,295)
1% increase in expected rate of pension increase	83,222
1% decrease in expected rate of pension increase	(71,966)

31.10 Five year data on surplus / (deficit) of the plans and experience adjustments

	2022	2021	2020	2019	2018
	----- (Rupees in '000) -----				
Present value of obligations	857,182	839,507	835,613	750,678	656,937
Fair value of plan assets	881,175	849,183	796,097	685,351	624,610
(Surplus) / Deficit	(23,993)	(9,676)	39,516	65,327	32,327
Experience adjustment on plan liabilities - loss / (gain)	(9,399)	(14,019)	(51,293)	5,915	(12,031)

	2022 Rupees in '000
31.11 Expected contributions to be paid to the fund in the next financial year	28,555
31.12 Expected charge for the next financial year	21,724

31.13 Maturity profile

The weighted average duration of the obligation (in years) **11.0**

31.14 Funding Policy

The administration of defined benefit pension scheme is governed under provision of trust deeds. The trustees agreed to act in accordance with the terms and conditions of these deeds including investment. Funding levels are monitored on annual basis based on actuarial recommendations.

31.15 Following are the significant risks associated with the defined benefit scheme / plan assets;

Final Salary Risk (linked to inflation risk)	The risk that the final salary at the time of cessation of service is greater than what we assumed. Since the benefit is calculated on the final salary (which will closely reflect inflation and other macroeconomic factors), the benefit amount increases as salary increases.
Demographic Risks	Mortality Risk - The risk that the actual mortality experience is different than the assumed mortality. This effect is more pronounced in schemes where the age and service distribution is on the higher side. Withdrawal Risk - The risk of actual withdrawals experience is different from assumed withdrawal probability. The significance of the withdrawal risk varies with the age, service and the entitled benefits of the beneficiary.
Investment Risk	The risk of the investment underperforming and being not sufficient to meet the liabilities

32 DEFINED CONTRIBUTION PLAN

All confirmed permanent employees of the Pakistan Operations are eligible for provident fund and gratuity fund schemes. In case of provident fund, contributions are made both by the employee and the employer on monthly basis, whereas; in gratuity funds only by the employer for confirmed staff at each year end.

33 COMPENSATION OF CHIEF COUNTRY OFFICER AND EXECUTIVES

	Chief Country Officer		Executives

34 FAIR VALUE MEASUREMENTS

Fair value measurement defines fair value as the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participant at the measurement date. The fair value of other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since these are either short-term in nature or, in the case of customer loans and deposits, are frequently

34.1 Fair value of financial assets

The Pakistan Operations measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

	2022			
	Fair Value			
	Level 1	Level 2	Level 3	Total
	------(Rupees in '000)-----			
On balance sheet financial instruments				
Financial assets - measured at fair value				
Investments				
- Federal Government Securities	-	32,008,766	-	32,008,766
Other Assets				
- Unrealized gain on forward foreign exchange contracts	-	-	-	-
Financial Liabilities - measured at fair value				
Other Liabilities				
- Unrealized loss on forward foreign exchange contracts	-	7	-	7
Off-balance sheet financial instruments - measured at fair value				
Forward purchase of foreign exchange	-	3,178	-	3,178
Forward sale of foreign exchange	-	-	-	-
	------(Rupees in '000)-----			
	------(Rupees in '000)-----			
On balance sheet financial instruments				
Financial assets - measured at fair value				
Investments				
- Federal Government Securities	-	14,352,092	-	14,352,092
Other Assets				
- Unrealized gain on forward foreign exchange contracts	-	36,121	-	36,121
Financial Liabilities - measured at fair value				
Other Liabilities				
- Unrealized loss on forward foreign exchange	-	36,708	-	36,708
Off-balance sheet financial instruments - measured at fair value				
Forward purchase of foreign exchange	-	3,915,419	-	3,915,419
Forward sale of foreign exchange	-	8,454,081	-	8,454,081

There were no transfers between different fair value hierarchy levels during the current year.

34.2 Valuation techniques used in determination of fair values:

Financial instruments included in level 2 comprise of Market Treasury Bills, Pakistan Investment Bonds, and forward foreign exchange contracts.

Item	Valuation approach and input used
Forward foreign exchange contracts	The valuation has been determined by interpolating the FX revaluation rates announced by the State Bank of Pakistan.
Market Treasury Bills (MTB) / Pakistan Investment Bonds(PIB)	The fair value of MTBs and PIBs are derived using PKRV rates.

35 SEGMENT INFORMATION

35.1 Segment Details with respect to Business Activities

DB Pakistan Operations operate under a transfer pricing framework that applies to all businesses and promotes pricing of :

- (i) assets in accordance with their underlying liquidity risk;
- (ii) liabilities in accordance with their funding maturity; and
- (iii) contingent liquidity exposures in accordance with the cost of providing for commensurate liquidity reserves to fund unexpected cash requirements.

Within this transfer pricing framework we allocate funding and liquidity risk costs and benefits to the business units and set financial incentives in line with the liquidity risk guidelines. Transfer prices are subject to liquidity (term) premiums depending on market conditions. Liquidity premiums are set by Treasury and picked up by a segregated liquidity account. The Treasury liquidity account is the aggregator of long- term liquidity costs. The management and cost allocation of the liquidity account is the key variable for transfer pricing funding costs within Deutsche Bank.

Corporate Bank

Corporate Bank provides commercial banking products and services for both corporates and financial institutions worldwide, including domestic and cross-border payments, cash management, international trade finance, depository, custody and related services.

Investment Bank

Global Emerging Markets provides Foreign Exchange services to clients in Pakistan on the back of cross-border payments, international trade, institutional flows and bond trading.

Infrastructure and Regional Management

It includes all the back offices which are responsible to provide support services to the businesses. The Treasury business is also a part of Infrastructure and Regional Management.

36 TRUST ACTIVITIES

DB Pakistan Operations are engaged in providing custodial and clearing services to its clients. This results in the bank holding and placing assets of its clients on their behalf. These are not assets of the DB Pakistan Operations and, therefore, are not included in the statement of financial position. The following is the list of assets held on behalf of DB Pakistan clients:

Type of security	2022	2021
	----- (Rupees in '000) -----	
Government Securities	2,798,355	25,142,810
TFCs and Sukuks	30,335	14,061
Shares	31,536,455	70,254,384
	34,365,145	95,411,255

37 RELATED PARTY TRANSACTIONS

Related parties comprise of Head office, other branches of the Bank and employees' retirement benefit funds. The transactions with related parties are conducted under normal course of business at arm's length prices. The Pakistan Operations also provide advances to employees at reduced rate in accordance with their terms of employment. The transactions and balances with related parties, other than those under the terms of employment and those disclosed elsewhere are summarized as follows:

39 RISK MANAGEMENT**39.1 Risk Management Framework**

The Pakistan Operations are subject to the Group's risk management framework. The diversity of our global business model requires us to identify, measure, aggregate and manage our risks, and to allocate our capital among our businesses. We operate as an integrated group through our divisions, business units and infrastructure functions. Risk and capital are managed via a framework of principles, organizational structures and measurement and monitoring processes that are closely aligned with the activities of the divisions and business units:

- Core risk management responsibilities are embedded in the Management Board and delegated to senior risk management committees responsible for execution and oversight. The Supervisory Board regularly monitors the risk and capital profile.
- We operate a three-line of risk management model whereby front office functions, risk management oversight and assurance roles are played by functions independent of one another.

- Risk strategy is approved by the Management Board on an annual basis and is defined based on the Group Strategic and Capital Plan and Risk Appetite in order to align risk, capital and performance targets.
- Cross-risk analysis reviews are conducted across the Group to validate that sound risk management practices and a holistic awareness of risk exist.
- All major risk classes are managed via risk management processes, including: credit risk, market risk, operational risk, liquidity risk, business risk and reputational risk. Modeling and measurement approaches for quantifying risk and capital demand are implemented across the major risk classes.
- Monitoring, stress testing tools and escalation processes are in place for key capital and liquidity thresholds and metrics.
- Systems, processes and policies are critical components of our risk management capability.
- Recovery planning provides for the escalation path for crisis management governance and supplies Senior Management with a list of actions designed to improve the capital and liquidity positions in a stress event.
- Resolution planning is closely supervised by the BaFin. It provides for a strategy to manage Deutsche Bank in case of default. It is designed to prevent the need for tax payer bailout and strengthen financial stability by the continuation of critical services delivered to the wider economy.'

39.2 Risk Governance

Group Management Board provides overall risk and capital management supervision for the Group and is exclusively responsible for day-to-day management. The Management Board has established the Group Risk Committee ("GRC") as the central forum for review and decision on material risk topics. The GRC is supported by following functional sub-committees:

- The Group Reputational Risk Committee ("GRRC") ensures the oversight, governance and coordination of the reputational risk management
- The Non-Financial Risk Committee ("NFRRC") ensures oversight, governance and coordination of non-financial risk management and establishes a cross-risk and holistic perspective of key non-financial risks
- The Enterprise Risk Committee ("ERC") ensures oversight and decision- making on financial risks and cross risks, including definition & review of stress tests, and management of group wide risk patterns.
- The Liquidity Management Committee ("LMC") decides upon mitigating actions to be taken during periods of anticipated or actual liquidity stress, or any relevant liquidity event

Our Chief Risk Officer ("CRO"), who is a member of the Management Board, is responsible for the identification, assessment and reporting of risks arising within operations across all business and all risk types, and has direct management responsibility for the following risk management functions: Credit Risk Management, Market Risk Management, Operational Risk Management and Liquidity Risk Control.

These are established with the mandate to:

- Support that the business within each division is consistent with the risk appetite that the CAR has set within a framework established by the Management Board;
- Formulate and implement risk and capital management policies, procedures and methodologies that are appropriate to the businesses within each division;
- Approve credit, market and liquidity risk limits;
- Conduct periodic portfolio reviews to keep the portfolio of risks within acceptable parameters; and
- Develop and implement risk and capital management infrastructures and systems that are appropriate for each division.

DB EMEA hub and Germany provide centralised Risk coverage to DB Pakistan. DB's Hubs include staff from relevant Risk-types ensuring effective risk management and capitalise on the intellectual and strategic synergies when housing risk-type subject-matter-expertise together.

Our Finance and Group Audit operate independently of both our business divisions and of our Risk function. The role of the Finance department is to help quantify and verify the risk that we assume and maintain the quality and integrity of our risk-related data. Group Audit examines, evaluates and reports on the adequacy of both the design and effectiveness of the systems of internal control including the risk management systems.

39.3 Risk Culture

We seek to promote a strong risk culture throughout our organization. A strong risk culture is designed to help reinforce our resilience by encouraging a holistic approach to the management of risk and return throughout our organization as well as the effective management of our risk, capital and reputational profile. We actively take risks in connection with our business and as such the following principles underpin risk culture within our group:

- Risk is taken within a defined risk appetite;
- Every risk taken needs to be approved within the risk management framework;
- Risk taken needs to be adequately compensated; and
- Risk should be continuously monitored and managed.

Employees at all levels are responsible for the management and escalation of risks. We expect employees to exhibit behaviors that support a strong risk culture. To promote this our policies require that behavior assessment is incorporated into our performance assessment and compensation processes. We have communicated the following risk culture behaviors through various communication vehicles:

- Being fully responsible for our risks;
- Being rigorous, forward looking and comprehensive in the assessment of risk;
- Inviting, providing and respecting challenges;
- Trouble shooting collectively; and
- Placing Deutsche Bank and its reputation at the heart of all decisions.

To reinforce these expected behaviors and strengthen our risk culture, we conduct a number of group-wide activities. Our Board members and senior management frequently communicate the importance of a strong risk culture to support a consistent tone from the top.

As part of our ongoing efforts to strengthen our risk culture, we review our training suite regularly to develop further modules or enhance existing components.

In addition, along with other measures to strengthen our performance management processes, we have designed and implemented a process to tie formal measurement of risk culture behaviors to our employee performance assessment, promotion and compensation processes. This process has been in place in our CB&S and GTB divisions since 2010 and has subsequently other divisions also.

This process is designed to further strengthen employee accountability.

The risk governance framework at the Pakistan Operations is designed according to a Three Lines of Defence (3LoD) operating model in order to ensure clear accountabilities for and a comprehensive, but non-duplicative, coverage of all risk management activities across Group.

- The 1st Line of Defense ("1st LoD") are all the business divisions and service providing infrastructure areas (Group Technology Operations and Corporate Services) who are the "owners" of the risks.
- The 2nd Line of Defense ("2nd LoD") are all the independent risk and control infrastructure functions.
- The 3rd Line of Defense ("3rd LoD") is Group Audit, which assures the effectiveness of our controls.

DB Pakistan requires strict independence between its 3 LoD in order to avoid conflicts of interest by an appropriate separation of functions and responsibilities. DB Pakistan requires all lines of defence to establish an effective and efficient internal governance structure with well-defined roles and responsibilities.'

39.4 Risk Appetite and Capacity

We use a broad range of quantitative and qualitative methodologies for assessing and managing risks. As a matter of policy, we continually assess the appropriateness and the reliability of our quantitative tools and metrics in light of our changing risk environment. Some of these tools are common to a number of risk categories, while others are tailored to the particular features of specific risk categories. The advanced internal tools and metrics we currently use to measure, manage and report our risks are:

- RWA equivalent.
- Expected loss.
- Return on risk-weighted assets ("RoRWA").
- Value-at-risk.
- Economic capital.

39.5 Stress testing

We have a strong commitment to stress testing performed on a regular basis in order to assess the impact of a severe economic downturn on our risk profile and financial position. These exercises complement traditional risk measures and represent an integral part of our strategic and capital planning process. Our stress testing framework comprises regular Group-wide stress tests based on internally defined benchmark and more severe macroeconomic global downturn scenarios. Locally, we perform testing on quarterly basis as per the BSD Circular # 1 dated May 11, 2012 of State Bank of Pakistan.

39.6 Risk Inventory

We face a variety of risks as a result of our business activities, the most significant of which are described below. Credit risk, market risk and operational risk attract regulatory capital. As part of our internal capital adequacy assessment process, we calculate the amount of economic capital from credit, market, operational and business risk to cover risks generated from our business activities taking into account diversification effects across those risk types. Furthermore, our economic capital framework implicitly covers additional risks, e.g. reputational risk and refinancing risk, for which no dedicated EC models exist. Liquidity risk is excluded from the economic capital calculation since it is covered separately.

39.6.1 Credit Risk

Credit risk arises from all transactions where actual, contingent or potential claims against any counterparty, borrower, obligor or issuer (which we refer to collectively as “counterparties”) exist, including those claims that we plan to distribute.

Based on the annual risk identification and materiality assessment, Credit Risk contains four material categories, namely default risk, industry risk, country risk, and product risk.

- Default risk, the most significant element of credit risk, is the risk that counterparties fail to meet contractual obligations in relation to the claims described above;
- Industry risk is the risk of adverse developments in the operating environment for a specific industry segment leading to deterioration in the financial profile of counterparties operating in that segment and resulting in increased credit risk across this portfolio of counterparties;
- Country risk is the risk that we may experience unexpected default or settlement risk and subsequent losses, in a given country, due to a range of macro-economic or social events primarily affecting counterparties in that jurisdiction including: a material deterioration of economic conditions, political and social upheaval, nationalization and expropriation of assets, government repudiation of indebtedness, or disruptive currency depreciation or devaluation. Country risk also includes transfer risk which arises when debtors are unable to meet their obligations owing to an inability to transfer assets to non-residents due to direct sovereign intervention; and'
- Product Risk captures product-specific credit risk of transactions that could arise with respect to specific borrowers or group of borrowers. It takes into account whether obligations have a similar risk characteristics and market place behaviors.

DB's credit risk appetite is set globally and is broken down to divisions and business units via the Strategic, Risk & Capital Plan approved by the Management Board of Deutsche Bank Group. As a result, each credit exposure is authorised only if the relevant business division at Deutsche Bank global level is satisfied that the exposure meets the pre-set criteria and limits.

CRM is organised globally and carries out risk identification, assessment, management, monitoring and reporting of credit risks. The CRM department is independent from business. Accordingly, DB Pakistan adopts the credit policies of DB Group and is responsible for establishing local policies and procedures to ensure compliance with DB Group principles.

Credit Risk is managed for DB Group globally on the basis of a “one obligor principle”; new credit exposures as well as annual / bi-annual reviews of credit exposures require approval by the appropriate authority holder covering the entire DB Group exposure. All credit risk decisions relevant to DB Pakistan are subject to the approval of DB Pakistan's management and/or DB Group's Credit Risk Management (CRM).

We measure and manage our credit risk using the following philosophy and principles:

- Our credit risk management function is independent from our business divisions and in each of our divisions credit decision standards, processes and principles are consistently applied.
- A key principle of credit risk management is client credit due diligence. Our client selection is achieved in collaboration with our business division counterparts who stand as a first line of defence.

- We aim to prevent undue concentration and tail-risks (large unexpected losses) by maintaining a diversified credit portfolio. Client-, industry-, country- and product-specific concentrations are assessed and managed against our risk appetite.
- Every new credit facility and every extension or material change of an existing credit facility (such as its tenor, collateral structure or major covenants) to any counterparty requires credit approval at the appropriate authority level. We assign credit approval authorities to individuals according to their qualifications, experience and training, and we review these periodically.
- We have established within Credit Risk Management – where appropriate – specialized teams for deriving internal client ratings, analyzing and approving transactions, monitoring the portfolio or covering workout clients.
- Our credit related activities are governed by our Principles for Managing Credit Risk. These principles define our general risk philosophy for credit risk and our methods to manage this risk. The principles define key organizational requirements, roles and responsibilities as well as process principles for credit risk management and are applicable to all credit related activities undertaken by us.

Credit Risk Ratings

A basic and key element of the credit approval process is a detailed risk assessment of each credit-relevant counterparty. When rating a counterparty we apply in-house assessment methodologies, scorecards and our 26-grade rating scale for evaluating the credit-worthiness of our counterparties. The majority of our rating methodologies are authorized for use within the advanced internal rating based approach under applicable Basel rules. Our rating scale enables us to compare our internal ratings with common market practice and promotes comparability between different sub-portfolios of our institution. Several default ratings therein enable us to incorporate the potential recovery rate of unsecured defaulted counterparty exposures. We generally rate our counterparties individually, though certain portfolios of purchased or securitized receivables are rated on a pool basis. Ratings are required to be kept up-to-date and documented.

The algorithms of the rating procedures for all counterparties are recalibrated frequently on the basis of the default history as well as other external and internal factors and expert judgments.

Credit Approval and Authority

Credit limits are established by the Credit Risk Management function via the execution of assigned credit authorities. Credit approvals are documented by signing of the credit report by the respective credit authority holders and retained for future reference. Credit authority is generally assigned to individuals as personal credit authority according to the individual's professional qualification and experience. All assigned credit authorities are reviewed on a periodic basis to help ensure that they are adequate to the individual performance of the authority holder. The results of the review are presented to the Group Credit Policy Committee.'

Where an individual's personal authority is insufficient to establish required credit limits, the transaction is referred to a higher credit authority holder or where necessary to an appropriate credit committee such as the Underwriting Committee. Where personal and committee authorities are insufficient to establish appropriate limits, the case is referred to the Management Board for approval.

Monitoring Credit Risk

Ongoing active monitoring and management of Deutsche Bank's credit risk positions is an integral part of our credit risk management framework. The key monitoring focus is on quality trends and on concentrations along the dimensions of counterparty, industry, country and product-specific risks to avoid undue concentrations of credit risk. On a portfolio level, significant concentrations of credit risk could result from having material exposures to a number of counterparties with similar economic characteristics, or who are engaged in comparable activities, where these similarities may cause their ability to meet contractual obligations to be affected in the same manner by changes in economic or industry conditions.

Our portfolio management framework supports a comprehensive assessment of concentrations within our credit risk portfolio in order to keep concentrations within acceptable levels.

Credit Exposures

We define our credit exposure by taking into account all transactions where losses might occur due to the fact that counterparties may not fulfil their contractual payment obligations.

Particulars of Pakistan Operations' significant on-balance sheet and off-balance sheet credit risk in various sectors are analysed as follows:

39.6.2 Market Risk

Market risk arises from the uncertainty concerning changes in market prices and rates (including interest rates and foreign exchange rates), the correlations among them and their levels of volatility.

MR Managers identify market risks through active portfolio analysis and engagement with the business areas. As a key control function, MRM ensures that DB Pakistan remains within the overall risk appetite set by the Group by establishing limits and monitoring the levels of Market Risk (MR). DB Pakistan is integrated into Deutsche Bank Group's global limit system, which is defined, monitored and controlled by MRM.

DB Pakistan uses following key metrics to monitor and limit market risk:

- Economic Capital is a stress testing based measurement of an expected worst case loss.
- VaR is a quantitative measure of the potential loss (in value) of Fair Value positions due to market movements that will not be exceeded in a defined period of time and with a defined confidence level.
- Stressed Value-at-Risk calculates a stressed value-at-risk measure based on a one year period of significant market stress.

DB Pakistan has adopted standardized approach for market risk which is approved regulatory approach.

39.6.2.2 Foreign Exchange Risk

At a local level, we ensure the overall foreign exchange exposure of Pakistan Operations remains within the limits set by SBP. We do not take any currency exposure except to the extent of the Statutory Net Open Position Limit prescribed by SBP.

Internal limits are in place to monitor Foreign Exchange open and mismatched positions on a daily basis and are marked-to-market daily to contain forward exposures to meet regulatory compliance issued periodically.

Yield risk is the risk of decline in earnings due to adverse movement of the yield curve. Interest rate risk is the risk that the value of financial instruments will fluctuate due to changes in the market interest rates. The Bank is exposed to various risks associated with the effects of fluctuation in the prevailing levels of market interest rates on its financial position and cash flows. The Bank manages this risk by matching the re-pricing of assets and liabilities and off-balance sheet instruments.

39.6.3 **Operational Risk**

Operational risk means the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, and includes legal risk. Operational risk excludes business and reputational risk. Particular prominent examples of operational risks are Fraud Risk, Business Continuity Risk, Regulatory Compliance Risk, Information Technology Risk and Vendor Risk.

Legal Risk may materialize in any of the above risk categories. This may be due to the fact that in each category we may be the subject of a claim or proceedings alleging non-compliance with contractual or other legal or statutory responsibilities; or we may otherwise be subject to losses allegedly deriving from other law or legal circumstances applicable to any of the above categories.

Organizational Structure

Risk Management for DB AG Pakistan Branch (both Karachi and Lahore) is performed offshore following the RCEB (Region Country Entity Branch) concept defined in the risk management policy of DB Group. There is no onshore presence of risk management personnel.

Consequently risk management in the country is supervised by the Pakistan Country Risk Contact (CRC), reporting to DB AG's Chief Risk Officer for the EMEA region, with individual responsibility for specific risk types assigned to Risk Point of Contacts (PoC). Currently this extends to separate owners of the Credit, Market, Liquidity and Non-Financial risks.

CRC represents risk management in all relevant decision making fora for Pakistan as permanent member of the Operating Committee and Asset-Liability Committee. In addition NFRM PoC remains permanent guest at the OpCo, while CRM PoC is voting member of the

Managing Our Operational Risk

We manage operational risk based on a Group-wide consistent framework that enables us to determine our operational risk profile in comparison to our risk appetite and systematically identify operational risk themes and concentrations to define risk mitigating measures and priorities.

Based on the organizational set-up, the governance and systems in place to identify and manage the operational risk and the support of control functions responsible for specific operational risk types (e.g. Compliance, Corporate Security & Business Continuity Management) we seek to optimize the management of operational risk. Future operational risks (identified through forward-looking analysis) are managed via mitigation strategies such as the development of back-up systems and emergency plans. We buy insurance in order to protect ourselves against unexpected and substantial unforeseeable losses.

39.6.3.1 **Operational Risk-Disclosures Basel II Specific**

For purpose of complying with local Basel III regulatory requirements in Pakistan, we follow the implementation guidelines ('Implementation of Basel III') issued by State Bank of Pakistan.

As required by State Bank of Pakistan regulations, DB in Pakistan employs the Basic Indicator Approach (BIA) for 2022.

39.6.4 **Liquidity Risk**

Liquidity risk is the risk arising from our potential inability to meet all payment obligations when they come due or only being able to meet these obligations at excessive costs. The objective of the DB Pakistan's liquidity risk management framework is to ensure that it can fulfill its payment obligations at all times and can manage liquidity and funding risks within its risk appetite. The framework considers relevant and significant drivers of liquidity risk, whether on balance sheet or off-balance sheet.

The Management Board defines our liquidity risk strategy, and in particular our tolerance for liquidity risk based on recommendations made by Treasury and the Capital and Risk Committee. The Management Board reviews and approves the limits which are applied to the Group to measure and control liquidity risk as well as the Pakistan Operations' long-term funding and issuance plan.

Our Treasury function is responsible for the management of liquidity and funding risk of Deutsche Bank globally as defined in the liquidity risk strategy. Our liquidity risk management framework is designed to identify, measure and manage the liquidity risk position of the Group. Treasury reports the Pakistan Operations' overall liquidity and funding to the Management Board at least weekly via a Liquidity Scorecard. Our liquidity risk management approach starts at the intraday level (operational liquidity) managing the daily payments queue, forecasting cash flows and factoring in our access to Central Banks. It then covers tactical liquidity risk management dealing with access to secured and unsecured funding sources. Finally, the strategic perspective comprises the maturity profile of all assets and liabilities (Funding Matrix) and our issuance strategy.

Our cash-flow based reporting system provides daily liquidity risk information to global and regional management.

Stress testing and scenario analysis plays a central role in our liquidity risk management framework. This also incorporates an assessment of asset liquidity, i.e. the characteristics of our asset inventory, under various stress scenarios as well as contingent funding requirements from off-balance-sheet commitments. The monthly stress testing results are used in setting our short-term wholesale funding limits (both unsecured and secured) and thereby ensuring we remain within the Board's overall liquidity risk tolerance.

Being DB's EMEA hub, Treasury & Capital Management (TCM) team in EMEA oversees the liquidity risk and capital management for the whole of EMEA. Currently, there is one Treasurer and one Treasury analyst who manage day to day liquidity risk and capital management for Pakistan. Liquidity and capital managers of TCM/risk management is supported by a web-based system, dbCube, which helps liquidity to monitor the liquidity situation of any DB entity at any location any time. All liquidity risk and capital related issues for DB branches in Pakistan are discussed by the local Asset and Liability Committee (ALCO), chaired by the treasurer, and comprising all businesses and supporting functions, i.e. Finance and Compliance. The local ALCO provides a forum for managing the liquidity, capital and funding positions of the local entity to meet regulatory compliance. Meetings of the local ALCO are held on a regular basis with ad-hoc meetings called when required.
